INTRODUCTION

Wisdom Sprouts is an esteemed IT training institute committed to providing comprehensive and industry-relevant training programs. With a focus on empowering individuals with the necessary skills to thrive in the competitive job market, we offer a wide range of courses in various domains, including web development, data science, cloud computing, and more.

ABOUT US

Our team of experienced trainers brings deep expertise and practical insights to the classroom, ensuring that students receive top-quality education and hands-on experience. We pride ourselves on our student-centric approach, where each learner is given personalized attention and guidance to enhance their learning journey.

At Wisdom Sprouts, we believe in bridging the gap between theoretical knowledge and real-world application. That's why we provide opportunities for students to work on live projects, gain industry exposure, and develop a strong skill set that aligns with current market demands.

We are also dedicated to helping our students succeed beyond the classroom. Our comprehensive placement assistance program equips students with essential interview skills, resume building techniques, and connects them with our extensive network of hiring partners.

Join Wisdom Sprouts today and unlock your potential to thrive in the ever-evolving IT industry. Let us be your guiding light on your path to a successful and rewarding career

100%
JOB GUARANTEE

**ONLY FOR PROFESSIONALS
& FINAL YEAR GRADUATES**

The Job Fulfillment Program is a flagship offering by Wisdom Sprouts designed to provide aspiring professionals and final-year graduates with the necessary skills and knowledge to excel in their careers. This comprehensive program is tailored to meet the demands of the ever-evolving job market and equip participants with industry-relevant expertise.

The program covers Data structures & Algorithms, Front-End Development, Back-End Development, and Database. Complete Fullstack Web Development - MERN Stack Through a carefully curated curriculum, participants gain a deep understanding of core concepts and hands-on experience with practical assignments and projects.

PROGRAM FLOW

1

BASICS OF COMPUTER PROGRAMMING

- Programming fundamentals
- Data Structures

2

FUNDAMENTALS OF WEB DEVELOPMENT

- HTML, CSS, Javascript, jQuery

3

ADVANCE WEB DEVELOPMENT

- React.js, Node.js, MongoDB, AWS

4

INTERNSHIP + LIVE PROJECT

- Live hands-on projects

5

FINAL TOUCH-UPS

- Placement Enhancement Program
- Soft Skills
- Job Calls

1. MERN – Web Development:

Learning MERN stack assures you a wide range of career options

Syllabus Summary

- HTML
- CSS
- Bootstrap
- Javascript
- React.js
- Node.js
- Express.js
- MongoDB
- Overview of AWS
- Git & GitHub
- Basic Website Optimization
- Bonus Content
- Sample Mini Project
- Sample Mega Project

Internship Flow

TRAINING 01

For first 120 days you would be trained on your selected skillset. This would be a fast yet detailed training

PROJECT SELECTION 02

After training completion each individual would be required to select a project. The idea would be brainstormed with the mentor

PROJECT IMPLEMENTATION 03

You will start working on your project, if you face any difficulties, our mentors will help you through

PROJECT REVIEW 04

In 6 Month, you will need to submit your project and your mentors will review the project.

INTERNSHIP COMPLETION 05

Upon successful review, you will receive your internship completion letter and ML/AI Training certificate.

SYLLABUS - MERN - 6 MONTHS

HTML

- Introduction to HTML
- Tags, Elements, and Attributes
- Basics of Syntax
- Creating Tables
- Working with Lists
- Building Forms
- Structure of HTML5
- Semantic and Non-semantic Tags
- HTML5 Features
- New Input Types
- Form Attributes
- Introduction to SVG (Scalable Vector Graphics)
- Canvas Element for Graphics
- Implementing Audio and Video Tags

CSS

- Using Attributes (ID, Class, Style, Title)
- CSS Types (Inline, Internal, External)
- Understanding the Box Model
- Display Property (Block, Inline, None)
- Visibility and the Hidden Attribute
- Positioning Elements (Static, Relative, Absolute, Fixed)
- Z-index Property for Stacking Order
- Working with Combinators (Descendant, Child, Adjacent Sibling, General Sibling)
- Exploring CSS Pseudo-classes (Link, Visited, Hover, Active)
- Utilizing CSS Pseudo-elements (First Line, First Letter, Before, After, Selection)
- Creating a Static Web Page
- Implementing the Viewport Meta Tag for Responsiveness

CSS3

- Background, Multiple Backgrounds
- Font Related Features (online fonts)
- Text-Effect and Box-Effect
- Gradients-Linear and Radial
- Transition
- Transformation
- Animation
- Media Queries

Bootstrap

- Introduction to Bootstrap
- Bootstrap Grid System and Responsive Design
- Bootstrap Components (Navbar, Carousel, Modal, etc.)
- Customizing Bootstrap Themes
- Introduction to Web Performance Optimization
- Minification and Compression of Assets
- Lazy Loading Images and Optimizing CSS/JavaScript

Javascript

- Introduction to JavaScript
- Variables, Data Types, and Type Conversion
- Operators and Expressions
- Conditional Statements (if, else, switch)
- Looping Statements (for, while, do-while)
- Function Declarations and Expressions
- Scope and Variable Visibility
- Handling Objects and Arrays
- String Operations
- Document Object Model (DOM)
- Selecting and Modifying HTML Elements
- Creating and Removing Elements Dynamically
- Event Handling and Listeners
- Event Handling with Event Delegation
- Dynamic Content Updates without Page Refresh
- Fetching Data from APIs and Updating the DOM

React.js

- Introduction to React.js and its core concepts
 - Components, JSX, and the Virtual DOM
- Building your first React component
 - Functional components vs. class components.
 - JSX syntax and rendering elements
- Props and State
 - Passing data to components using props
 - Managing component state using setState
- React Router and Single-Page Applications
 - React router
 - Route parameters and dynamic routing
 - Nested routes
 - Protecting routes with authentication guards
- State Management with Redux (or Context API)
 - Introduction to Redux
 - Actions, reducers, and the Redux store
 - Dispatching actions and updating state
 - Async actions with Redux Thunk or Redux Saga
 - Redux project structure
- React Hooks and Functional Components
 - useState, useEffect, and other built-in hooks
 - Fetching data from APIs
 - Custom hooks
- Reusable UI Components
 - Component libraries (e.g., Material-UI, Ant Design)
 - CSS-in-JS, styled-components, and CSS modules
 - Creating a library of reusable UI elements
- Consuming RESTful APIs
 - Axios and Fetch API
 - API responses and errors
 - Integrating API data into React components

Node.js And Express.js

- Introduction
- Core modules
- Callbacks, Promises, and async/await
- Introduction to Express.js
 - Defining routes and handling HTTP methods
- Middleware
 - Custom middleware
 - Request & response objects
- Error Handling and Validation
 - Error middleware
 - Input validation
- Integration with MongoDB
 - Performing CRUD (Create, Read, Update, Delete) operations
- Mongoose
 - Schemas and models
 - Database operation using Mongoose
 - Indexing, aggregation, and data validation
 - Handling relationships
- Authentication
- Logging & Error Handling
- Libraries - Winston/Morgan
- Rest APIs

MongoDB

- SQL vs NoSQL
- Data Modeling
- Creating and Inserting Documents
 - Inserting data into collections.
 - Bulk inserts and data import.
- Querying Data
 - Find, findOne, and query operators
 - Sorting and Pagination
- Updating and Deleting Documents
 - Update operations and modifiers.
 - Removing documents from collections.
- Aggregation framework
 - \$group, \$match
- Indexing

SYLLABUS - MERN - 6 MONTHS

Overview of AWS

- Cloud computing overview
- Introduction to AWS
- AWS Service Categories – Compute, Storage, Database, Networking, Security, etc.
- AWS Management Console
- Regions and Availability Zones
- EC2
- S3
- RDS, DynamoDB
- VPC, Security Groups
- Cloudwatch
- Lambda
- Best practices and cost management

Git & Github

- Version Control with Git and GitHub
- Introduction to Version Control and Git Concepts
- Cloning, Committing, and Pushing Code to Repositories

Basic Website Optimization

- Basics of Web Performance Optimization
- Minification and Compression of Assets
- Lazy Loading Images and Optimizing CSS/JavaScript
- Web Accessibility Considerations and Practices

Bonus Content

- Guest Lectures by Industry Professionals
- Mock Interviews and Resume Building Workshops
- Guidance on Building a Professional Portfolio
- Soft Skills Development: Communication, Teamwork, Problem-Solving
- Mid-Course Assessment to Gauge Understanding and Progress
- Job Interview Preparation and Mock Interview Sessions
- Assistance in Job Placement and Internships
- Access to Alumni Network and Industry Events

Sample Mini Projects

- Personal portfolio website that showcases the student's skills and projects. The website would include
 - A homepage with a brief introduction and profile picture.
 - Sections for displaying projects, each with a title, description, and images/screenshots.
 - A contact section with a form for visitors to send messages.
 - Utilize HTML, CSS (including Bootstrap), and possibly a bit of JavaScript for form validation
- Interactive image gallery that displays a collection of images and provides user-friendly features. The project would involve:
 - Creating a grid of images using HTML and CSS.
 - Implementing lightbox functionality: clicking on an image opens a larger version with navigation buttons.
 - Adding filters or categories to sort images dynamically using JavaScript/jQuery.
 - Applying CSS for a visually appealing and responsive design.
- Simple to-do list web application that allows users to manage tasks. This project can cover various concepts including:
 - Designing the user interface using HTML, CSS, and Bootstrap.
 - Using JavaScript/jQuery to handle tasks like adding, deleting, and marking tasks as completed.
 - Implementing local storage to persist tasks even after page refresh.
 - Enhancing the user experience with animations and transitions.

Sample Mega Project

- Web platform where users can search and browse real estate listings. The application will allow real estate agents to list properties for sale or rent, and potential buyers or renters can search for properties based on various criteria
 - User Authentication and Profiles
 - Property Listings
 - Search and Filter Functionality
 - Interactive Map
 - Property Details
 - User Reviews and Ratings
 - Saved Searches and Alerts

- **PEP- Placement Enhancement Program:**

SOFTSKILLS

PLACEMENT ENHANCEMENT PROGRAM

- Personality development
- Interview Preparation
- Job Interview Calls

Syllabus Summary

1. Persona Management
2. Effective Communication
3. Time Management
4. Logic Building for IT Graduates
5. for Freshers – What Not to Do in an Interview, How to Become the Number One Choice of Recruiters
6. Technical Round Preparation
7. HR Round Preparation
8. Resume Building & LinkedIn Profile Building
9. Profile Optimization on All Job Platforms
10. Aptitude Round Information
11. 1 on 1 Mentoring / Counseling
12. 10 Interview Calls

1. Persona Management:

- Understanding Personal Style
- Wardrobe Organization
- Basic Dressing Skills
- Grooming and Personal Care
- Hair Care Routine
- Hygiene Practices
- Scent Management
- Foot Care
- Laundry and Clothing Care
- Self-Care and Confidence Building

2. Effective Communication:

- Verbal Communication Skills
- Nonverbal Communication Skills
- Written Communication Skills
- Listening Skills
- Presentation Skills
- Interpersonal Communication
- Cross-Cultural Communication
- Digital Communication Etiquette
- Conflict Resolution Communication
- Assertiveness and Negotiation Skills

3. Time Management

- Setting SMART Goals
- Prioritization Techniques
- Time Blocking and Scheduling
- Task Delegation and Outsourcing
- Eliminating Time Wasters
- Managing Distractions
- Procrastination Prevention Strategies
- Using Technology for Time Management
- Stress Management and Work-Life Balance
- Continuous Improvement in Time Management Skills

4. Logic Building for IT Graduates

- Introduction to Logic and Problem-Solving
- Algorithmic Thinking and Problem Decomposition
- Data Structures and Algorithms
- Logical Reasoning and Deductive Thinking
- Programming Languages and Logic
- Critical Thinking in Software Development
- Error Handling and Debugging Techniques
- Logical Design Patterns
- Decision-Making in Software Engineering
- Continuous Learning and Logical Skill Enhancement

5. What Not to Do in an Interview for Freshers, How to Become the Number One Choice of Recruiters

- Common Interview Mistakes and Pitfalls
- Lack of Preparation and Research
- Poor Communication Skills
- Negative Body Language and Attitude
- Overconfidence or Underconfidence
- Being Unprofessional or Disrespectful
- Failure to Ask Questions or Engage with the Interviewer
- Failing to Follow Up After the Interview
- Ignoring Feedback or Not Learning from Mistakes
- Continuous Improvement and Learning from Interview Experiences

6. Technical Round Preparation

- Technical Fundamentals and Concepts
- Problem-Solving and Algorithmic Thinking
- Data Structures and Algorithms
- Programming Languages and Frameworks
- System Design and Architecture
- Database Management Systems (DBMS)
- Object-Oriented Programming (OOP) Principles
- Web Development Technologies and Practices
- Software Development Life Cycle (SDLC) and Agile Methodologies
- Coding and Debugging Skills

7. HR Round Preparation

- Understanding the Role of HR in the Hiring Process
- Crafting an Effective Personal Introduction or Elevator Pitch
- Highlighting Key Achievements and Strengths
- Addressing Weaknesses and Areas of Improvement
- Discussing Career Goals and Aspirations
- Understanding Behavioral Interview Questions and STAR Technique
- Preparing for Situational and Scenario-Based Questions
- Negotiating Salary and Benefits
- Asking Thoughtful Questions to the Interviewer
- Following Up After the Interview

8. Resume Building & LinkedIn Profile Building

- Understanding the Purpose of a Resume
- Crafting a Compelling Summary or Objective Statement
- Highlighting Key Skills and Achievements
- Listing Work Experience in Reverse Chronological Order
- Detailing Educational Background and Qualifications
- Incorporating Relevant Certifications and Training
- Showcasing Volunteer Work and Extracurricular Activities
- Formatting and Designing for Readability and Professionalism
- Tailoring the Resume for Specific Job Applications
- Proofreading and Editing for Accuracy

9. What Not to Do in an Interview for Freshers:

- Understanding the Importance of Profile Optimization
- Identifying Key Keywords and Skills for Target Roles
- Crafting a Compelling Headline and Summary
- Highlighting Key Achievements and Experiences
- Detailing Work History and Educational Background
- Showcasing Certifications, Training, and Awards
- Uploading a Professional Profile Picture
- Providing Contact Information and Links to Portfolio
- Customizing Profiles for Each Job Platform
- Monitoring and Updating Profiles Regularly

10. Aptitude Round Information

- Numerical Reasoning
- Verbal Reasoning
- Logical Reasoning
- Abstract Reasoning
- Spatial Reasoning
- Data Interpretation
- Quantitative Aptitude
- Problem-Solving
- Inductive Reasoning
- Situational Judgment

I had a great learning journey with Wisdom Sprouts through the Job Fulfillment Program. I gained solid knowledge of the MERN Stack, from frontend to backend, and built real-world projects that boosted my confidence. The guidance and hands-on experience truly prepared me for a career in full stack development.

Great place to work and learn. Internship experience here provided me with lots of exposure to MEAN stack, the projects I got to work on improved my knowledge. In my 45 day internship period I learned not only about MEAN stack but also how to understand and approach a project and complete it. I also worked on an individual project which helped me get deep into understanding MEAN stack.

Positive: Communication, Professionalism, Quality

I have completed my 6 months Internship + classes in wisdom sprouts in June 2020, Pune. Overall, the experience I had was very exciting and interesting. Trainers are also very nice. I learned a lot. Internships are incredibly valuable for gaining experience, and ultimately helping you to land that dream job in your chosen sector. Wisdom Sprouts is a best platform to get your dream Job.

Wisdom Sprouts is a great institute for a fresher to join to get a real-time exposure of how an IT field works and to know how a student can mould himself to fit into an IT career. I personally have improved a lot after joining here. They trained us in all the aspects a fresher has to be trained in order to get a job. The Trainers here are very helpful, they try to provide us enough guidance and also check for the overall development of their students. I would recommend this institute for any person who is looking out for a great start in his career towards IT.
